

Timeline of the History of the Web

Start

The 60^s The Birth of the Internet

1965: The concept of packet switching is prposed by Lawrence Roberts. This formed the basis of Internet communication

1969: The USA Dept. of Defense creates ARPANET, the first packet-switching network that forms the basis of modern internet communication. This connectsed universties and research institutions.

The 80^s Era of World Wide Web

1989: Tim Berners-Lee, a researcher at CERN, proposes the concept of the World Wide Web as a way to share and access information over the internet. Thanks to ARPANET for using TCP/IP protocol.

Tim is refered to as the Father of the Internet.

The 2k^s The Dotcom and Web2.o

2001: Wikipedia, the online encyclopedia goes live.

2004: Facebook is launched. This begins the millenial social media boom. A Yeah later YouTube is launched.

2007: The first iPhoneis announced by Steve Jobs this, revolutionalizes the mobile web and mobile apps.

Year 2030 My prediction

The use Artificial Intelligence will rise, and Govts will have to enact new Laws to protect humanity.

The Internet will be essily accessible to all humans and countries will declare it a human right.

Language barriers will be completely a thing of the past as devices and AI will be used to translate and communi-cate much faster.

The 70^s TCP/IP & Email

1971: Ray Tomlinson creates the first email program.

1972: The TCP/IP protocol is developed by Robert Kahn and Vint Cerf . Now computers can communicate with each other. its still in this era the term “Internet” emerges

The 90^s The Web Evolution

1991: The first website goes LIVE. The website is still online today. Here is you can learn about the CERN project.

1994: Netscape Navigator is released, this is the first commercial web browser.

1998: Google is founded, revolutionizing web search. By this time People could shop online via Amazon.

In This era Yahoo, Amazon, Explorer, HTML and Javascript are born in this era.

The Present Where we are

Now you can study online, like i am doing.

During The COVID pandemic it changed how people view work and people now can work from hom and anywhere in the world. This has seen the rise of remote work.

Box Office movies are lauchning on streaming ser-vices... thank you NETFLIX.

Mobile Money Transfer via Mobile Apps like Cash App and Mpesa in Kenya.
